

RAYMA DESAI

Computer Science Engineer

+917096099960 | rayma09desai@gmail.com | [LinkedIn](#)

SUMMARY

Aspiring Software Developer with a strong interest in Artificial Intelligence (AI), Machine Learning (ML), and R programming, alongside proficiency in Python. Passionate about using technology to solve real-world problems, I thrive in dynamic environments and excel at tackling challenges. Eager to learn, grow, and contribute to innovative AI and ML projects while continuously advancing my skills.

EDUCATION

Computer Science Engineering CGPA - 7.35 SGPA - 7.67	September 2022 - Ongoing
GSFC University, Vadodara	

HSC Percentile - 71.82% Grade - B2	June 2020 - March 2022
AB Higher Secondary School, Navsari	

SSC Percentile - 94.84% Grade - B1	March 2020
St. Francis of Convent High School, Navsari	

TECHNICAL SKILLS

• Programming Languages:	Python, R, Java
• Web Development:	HTML, CSS, JavaScript
• Libraries/Frameworks:	Django, ReactJS, NodeJS, Flask
• Database Management:	MySQL, SQL Server, PostgreSQL
• Design Tools:	Canva
• Testing & Version Control:	GitHub
• Development Tools:	VS Code, R Studio, Python, Google Colab

AREA OF INTEREST

SKILLS

• Business Analyst (BA)	• Adaptable
• Quality Assurance (QA)	• Team work
• Product Analyst	• Fast learner
• Artificial Intelligence (AI)	• Communication
• Data Engineering	• Time Management
• Python	
• Software Development	

INTERNSHIPS

KIT Solutions PVT LTD | IT / Computers - Software

01 Dec, 2025 - 01 May, 2026

Intern

Key Skills: Node.js, React.js, Rest API, PostgreSQL

- It was a 6 month internship and I learned node.js and react.js for 2 weeks at the beginning of my internship.
- Then worked on the project Employee Management System using Node.js and React.js and PostgreSQL as database.

02 Jun, 2025 - 02 Jul, 2025

RedSpark Technologies | IT / Computers - Software

Python Developer

Key Skills: Postman, Django, Python, MySQL, PythonAnywhere

- I have worked on 2 projects during my 1 month internship. 1st project was Student Management System using python framework Django and MySQL as the database and after completing the project I uploaded it online using pythonanywhere.
- The 2nd project was Coupon Chatbot, in this project I trained the model on an inconsistent data of coupons so that the machine can give coupons according to the category, location and discount and coupon name and storing and referring the previous queries for easy access. For this also I used MySQL as database and created flask app.

02 Dec, 2024 - 11 Jan, 2025

CodingMissions IT Solutions

Python

Key Skills: Python

- I got this internship through AICTE. I learned python in this internship and did some tasks that were assigned.

29 Dec, 2023 - 29 Jan, 2024

Guitar Council (GSFC University)

- Developed an AI-powered Brain Tumour Detection system as part of the Guitar Council project at GSFC University during my 3rd semester internship, applying machine learning techniques to improve medical diagnosis accuracy.

PROJECTS

Student Management System

Mentor: Mr. Devansh Shah | **Team Size:** 2

Key Skills: Python Django

Project Link: <https://github.com/Rayma28/StudentManagement.git>

- I worked on Student Management System using python and Django as backend and used Django templates and javascript for front end and used MySQL as the dataset to store all the data of the management system. I kept two users for this site, Student User and Staff User. I also got to familiarize myself with pythonanywhere. I have uploaded this project on pythonanywhere. The link of my project on pythonanywhere is: rayma28.pythonanywhere.com

Coupon Chatbot

Mentor: Mr. Devansh Shah | **Team Size:** 2

Key Skills: Python, Jieba, Postman, Flask, API

Project Link: <https://github.com/Rayma28/couponai.git>

- I worked on coupon chatbot for a chinese application during my 1 month internship at Redspark Technologies. I used python for the backend. I used hybrid method that is python rule-based implementation and mistral api so that the chatbot can understand the query given by the user. I used jieba for the segmentation and tokenization of Chinese language query. I also got to know about postman for the http requests. This chatbot can take both english and chinese language queries.

Medibot

Mentor: Mr Deepak Parashar | **Team Size:** 4

Key Skills: Python, Flask, Natural Language Processing, Machine Learning

Project Link: <https://github.com/Rayma28/Medibot.git>

- This project is an AI-powered chatbot that provides basic medical diagnostics based on user input. It utilizes a trained machine learning model to predict possible diseases from symptoms described by the user, offering helpful insights and advice on what to do next. Uses Scit-Learn and Pandas to train the model

Few shot language agnostic keyword spotting system for audio

Mentor: Ms. Mosam Patel | **Team Size:** 4

- I worked on this project as my Minor Project for the 6th Semester. Built a Python-based audio processing system for detecting specific keywords in Gujarati language and dialects using few-shot learning techniques. Enabled users to upload audio files and automatically identify spoken keywords with minimal training data. Designed with scalability in mind, allowing future extension to support multiple Indian languages and dialects.

Employee Management System

Mentor: Mr. Neel Patel | **Team Size:** 1

Key Skills: Node.JS, React.JS, Typescript, REST API, PostgreSQL

Project Link: <https://github.com/Rayma28/EMS.git>

- This project is a Employee Portal that helps to manage the employee data and generate payroll and for attendance of the employees. I worked on this project during my 6 month internship at KIT Solutions PVT LTD company. I used node.js for backend and react.js for the frontend and postgresQL for the database. There are many features like leave management, request management, etc. that helps to make the management of data of the employees easier to manage.

CERTIFICATES

Cisco NetAcad (2nd Semester):

- Completed Introduction to Cybersecurity and Programming Basics for Automation Engineers.

Microsoft Azure (2nd Semester):

- Completed Azure AI Fundamentals (AI-900), covering core concepts of AI and cloud-based AI services.

Basic Life Skills (BLS) (5th Semester) :

- Completed a course in Basic Life Skills (BLS), developing essential skills for personal and professional growth, including communication, teamwork, and problem-solving.

Design & Implementation of Human-Computer Interfaces (NPTEL) (5th Semester):

- Completed an elite-certified course in Design & Implementation of Human-Computer Interfaces through NPTE, gaining expertise in creating user-centered and intuitive interfaces that enhance human-computer interaction.

EXTRACURRICULAR ACTIVITIES

LANGUAGES

- | | |
|---|------------------------------|
| • Participated in Smart India Hackathon in 4 th Semester and 5 th Semester. | • Gujarati (Native Language) |
| • Participated in Intra Volleyball Tournament and won Silver Medal. | • English |
| | • Hindi |
